Extremely Basic

Adapted by Neilor Tonin, URI 🇧🇷 Brazil

Timelimit: 1

Read 2 variables, named **A** and **B** and make the sum of these two variables, assigning its result to the variable **X**. Print **X** as shown below. Print endline after the result otherwise you will get "*Presentation Error*".

Input

The input file will contain 2 integer numbers.

Output

Print the letter **X** (uppercase) with a blank space before and after the equal signal followed by the value of X, according to the following example.

Obs.: don't forget the endline after all.

Samples Input	Samples Output
10 9	X = 19
-10 4	X = -6
15 -7	X = 8
